AI & Machine Learning Specialist | Business-Focused Artificial Intelligence

Professional Profile

Artificial Intelligence specialist with strong expertise in Python, Machine Learning, and Deep Learning. Focused on applying AI solutions to improve operational efficiency, optimize decision-making, and create data-driven business strategies. Skilled in transforming complex data into practical, scalable solutions for real-world business environments.

Business Value Focus

- ✓ Process automation using machine learning models
- ✓ Predictive analytics for smarter decision-making
- ✓ Computer vision solutions (CNN) for image-based systems
- ✓ Data-driven optimization and performance improvement
- ✓ AI integration into traditional business environments

Technical Expertise

Programming:

- Python (Advanced)

Machine Learning & AI:

- Supervised Learning (Regression, Decision Trees, Random Forest, SVM)
- Unsupervised Learning (Clustering – K-Means)
- Artificial Neural Networks (ANN)
- Convolutional Neural Networks (CNN)
- Transfer Learning
- Model Evaluation & Optimization

Frameworks & Libraries:

- Scikit-learn

- TensorFlow / Keras
- PyTorch
- NumPy & Pandas
- OpenCV

Tools:

- Jupyter Notebook
- Google Colab
- Git & GitHub

Selected Projects**AI-Based Image Classification System**

- Designed and implemented a Convolutional Neural Network for image classification tasks.
- Improved model performance using optimization and validation techniques.
- Demonstrated application of computer vision in business scenarios.

Predictive Business Analytics Model

- Built machine learning models to predict outcomes based on structured datasets.
- Performed data preprocessing, feature engineering, and model tuning.
- Selected optimal models based on performance metrics.

Data Analysis & Insight Generation

- Conducted exploratory data analysis to identify trends and patterns.
- Delivered insights that support strategic and operational decisions.
